

Team Name

Talk to Me...

Whose in the group?

Mert Erden, Dylan Hoffmann, Victor Gao

What is the Project?

Distributed Multi-Actor Audio Book Reader

What is minimum/maximum deliverables?

Minimum: A multithreaded reader on one machine that can work with predefined characters in the context of a play.

Maximum: A distributed reader that can detect and define characters from a book and subsequently read them.

What is the first step?

Scheduling meeting times and developing an architecture that processes actors.

What is the biggest problem?

Making the entire program sound natural to the user as they are listen to it on the application.
